

Exp No: 14

Code:

```
#include <reg51.h>
```

```
#include <stdio.h>
```

```
void main(void)
```

```
{
```

```
    SCON = 0x50; /* SCON: mode 1, 8-bit UART, enable receiver */
```

```
    TMOD = 0x20; /* TMOD: timer 1, mode 2, 8-bit reload */
```

```
    TH1 = 0xFD; /* TH1: reload value for 9600 baudrate */
```

```
    TR1 = 1; /* TR1: timer 1 run */
```

```
    TI = 1; /* TI: set TI to send first char of UART */
```

```
    while (1)
```

```
    {
```

```
        printf("Hello World \n");
```

```
    }
```

```
}
```

Output:
